

Lonnie Crumley, Lee Napier, Mike Kuttel, Bob Amrine, Chad Stussy and John Kliem were present.

### **Strategy Update**

#### *Brians's suggested actions-*

Brian put together a group of actions that he thought might help to streamline the strategy tables. To compile the list, he started by compiling all the general actions into one list (Original tab) and then he created a new worksheet that removed redundant actions (Edited tab). The group thought Brian's approach was worth furthering.

The group reviewed the list of actions presented by Brian and modified or accepted.

#### *Subbasin Chapters*

John asked for comments regarding the last version of the subbasin chapters. He asked the group to submit comments such as separating out the symptoms and causes. In some situations they are described together.

John will finish the chapter writing, with input from the group, and then call the peer review group together to finish the review.

The group will meet again on September 8<sup>th</sup> from 9:30am until noon.
